device drawings, pressure test reports, materials of construction and supplementary items. The new technology is initially available in Chesterton's S10 and S20 Cassette Seals.

The ViewIn web/mobile application can be downloaded for free from the Apple Store or Google Play. Seal information can also be entered and accessed at <https://chestertonrotating.chesterton.com/en-us/Products/Pages/ViewIn.aspx>.

For more information, visit www.chesterton.com/viewin or call (978) 469-6810.

Sun Coast now offering lubricant surveys

HOUSTON — Sun Coast Resources Inc. now offers a comprehensive lubricant survey to help facilities keep equipment running smoothly and efficiently. Lubricant surveys are an essential element of equipment reliability programs. The full survey begins with storage and handling of current lubricants and follows the lubricants through every piece of rotating equipment. Upon the survey's completion, the facility obtains a complete list of all lubricated equipment, which lubricant each piece of equipment uses, how often the lubri-

cants should be tested and how often they should be changed. The survey also provides recommended sample point locations, improvements to fluid handling and storage, and steps to prevent contamination.

For more information, visit www.suncoastresources.com or call (713) 844-9600.

BrandSafway introduces BrandTech™ Precision Welding

KENNESAW, Ga. — Industrial Specialists, a BrandSafway company and a member of the American Welding Society, is introducing BrandTech™ Precision Welding,

BrandSafway's new BrandTech™ Precision Welding is a modular welding system with built-in technology that allows for two welding guns to be used at the same time.

a modular welding system with built-in technology that allows for one or two welding guns to be used at the same time. Manufactured in the U.S. with American-made parts, BrandTech Precision Welding uses a drawn arc welding process, a very stable form of welding that reduces filler material and shielded gas while producing a complete fusion in less time with fewer welding layers.

BrandTech Precision Welding offers an easy-to-use touchpad control panel and dramatically reduces hexavalent chromium emissions, which decreases exposure risk and creates a safer workplace. The simple setup, rigging and operation reduce the amount of time and number of welders needed to complete a project.

For more information, visit www.brandtechwelding.com or call (800) 558-4772.

PROTO® launches new calibration equipment

TOWSON, Md. — PROTO® Industrial Tools has launched new calibration sensors, software and a torque bench.
