

# Your Bridge Advantage

For New Construction,  
Maintenance and Renovation

**BRAND** SAFWAY™

At Work For You™

## › Building Bridges Between Challenges & Solutions

**Forming and shoring. Access and coatings. Inspections and cable dehumidification. BrandSafway has the greatest depth of expertise and the widest range of market-leading brands and proprietary products for bridge construction, maintenance and renovation. We engineer the best solutions – designed to save time and money while always increasing safety – for bridge projects worldwide.**

## Powering Access with Spider®

With more than 70 years of experience, Spider® by BrandSafway manufactures and distributes suspended access and fall protection solutions across North America, including:

- › Access for cable dehumidification and inspection
- › Traction and drum material hoists
- › Work cages and baskets
- › Modular work platforms
- › Rigging equipment and supplies
- › Fall protection equipment

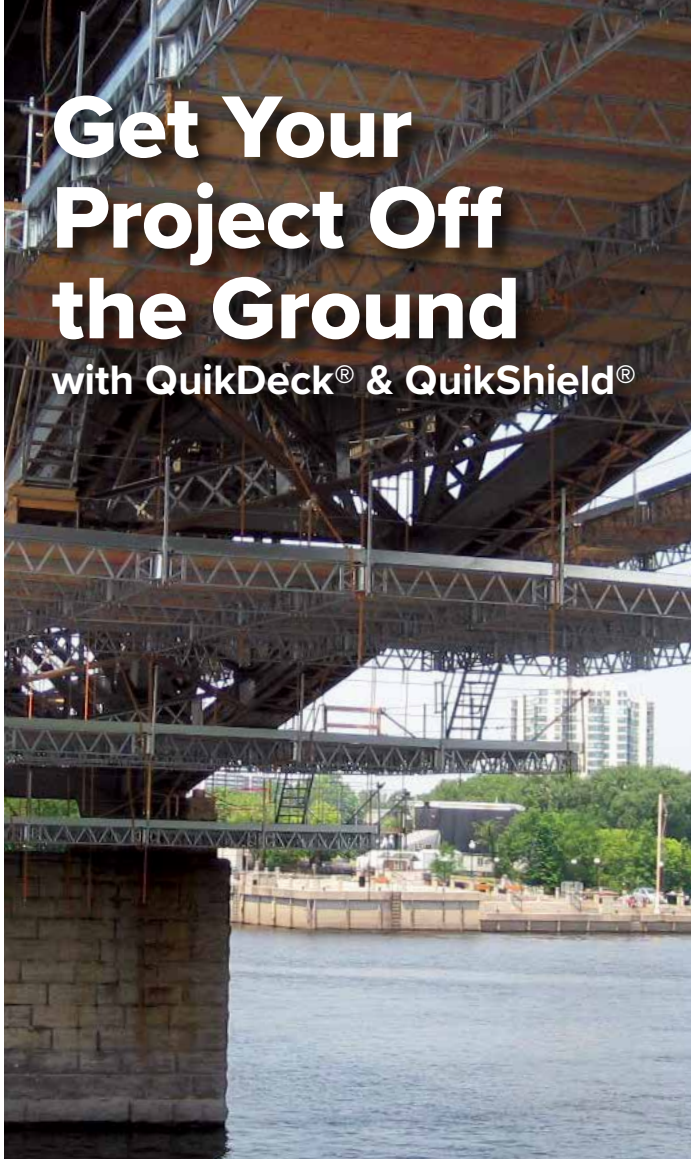

***“Spider’s engineers and local support team rose to every challenge. All in all, their responsiveness to our needs and our experience with their equipment have been excellent.”***

-Levi Gatsos, Design Engineer

# Get Your Project Off the Ground

with QuikDeck® & QuikShield®

The QuikDeck® Suspended Access System provides factory-floor-like conditions in the air, allowing multiple craftspeople to work side-by-side safely and efficiently. QuikShield® offers a lighter-weight, lower-cost rental option.

Other benefits include:

- › Components can be easily handled by one person
- › Can be built in the air or on the ground and then hoisted into position
- › No special tools or skills required
- › Load capacities: 25-75 psf (122-366 kg/m<sup>2</sup>)

## › Additional Services

### Expert Coatings Services

BrandSafway offers high-quality, expert coatings solutions. We provide clients with highly skilled professionals, including NCCER-certified craft professionals, all of whom are supported by over 35 NACE-trained and certified inspectors.

### Increase Efficiency with 3D Engineering

With the largest, most advanced in-house engineering department in the industry, BrandSafway uses dedicated 3D services – terrestrial scanning, survey support, aerial/mobile LiDAR, photogrammetry and inspection imagery, models and thermography – to let you experience a design solution before it's built. This leads to reduced risk, improved timelines, saved costs and better outcomes.

### Aluma Systems Forming & Shoring

With more than four decades of experience in over 50 countries, Aluma Systems by BrandSafway has developed an extensive range of formwork solutions for concrete slab, wall and bridge construction, designed to improve on-site productivity and optimize pour cycles.

## Rocky Creek Bridge (Big Sur, California)

Rocky Creek Bridge is part of the iconic Pacific Coastal Highway and one of the most photographed bridges on that route. QuikDeck provided a stable work platform beneath the bridge, which minimized lane closures on the already busy bridge and allowed the work to be finished six weeks ahead of schedule.

*“QuikDeck® provides much more traction, plus it gives us a more secure feeling. Stability-wise and strength-wise, there’s no comparison to the other systems I’ve worked on.”*

-Michael Kelleher, Superintendent of J.F. White Contracting Co.  
Longfellow Bridge (Boston, Massachusetts)

Contact us today to learn more about how we can save you time and increase quality on your next bridge project.
