

Precast Refractory Shapes

Any size refractory shape can be precisely cut and cast using our unique CNC (Computer Numeric Control) forming machine — whether it be reverse engineering, modifying an existing shape design or designing a brand new pre-cast refractory shape.

Advantages

- › Shorter lead times
- › Custom design capabilities
- › No on-site dry out required
- › Reduced cost
- › Improved quality
- › Rapid installation

› Precast Refractory Shapes

With our in-house forming machine we are able to cut ANY shape from high-density styrofoam. Burner blocks, nozzles or any specialty shape can be precast at our shop.

› Shapes Produced

- › Burner tiles
- › Tunnel covers
- › Castable lintels
- › Peep sights
- › Attachments for walking beam furnaces
- › Custom shapes

› For Any Industry!
