## Key Highlights

BrandSafway can provide a wide range of specialized services within stadium projects that require precise coordination and execution at scale. Here's an overview of the types of services typically offered:

### Safe Access

- › Providing patented SafMax®, SafLock® and Flex-Deck™ Systems
- › Utilizing proprietary digital tools such as SmartTag™
  - Geo-tracking tech for ultimate traceability and loss prevention

### QuikDeck® Suspended Access System

- › Providing safe access platforms for interior work including MEP, lighting, ceilings and fixtures
- › Supporting concourse renovations, premium seating upgrades, lighting replacements and phased renovations during active venue operations with the ability to work above and below simultaneously

### Forming & Shoring

- › Providing advanced and customizable formwork systems
- › Supporting concrete structures including post-tension decks, shear walls and parking structures

### Concrete Restoration

- › Repairing of slabs, parking structures, concourses, loading areas and surfaces
- › Providing FRP wrapping and column jacketing for seismic retrofits

### Insulated Metal Panels

- › Providing façade and exterior envelope access for prefab cladding system that reduces time and resists corrosion
- › Applying glazing, flashing and joint-sealant replacement on stadium and arena structures to halt water intrusion

### Insulation

- › Boosting HVAC efficiency, acoustic performance and temperature control across all mechanical infrastructure
- › Re-insulating HVAC ductwork, air-handling units, and overhead MEP systems during venue expansions

### PROVEN SAFETY RECORD

- › Strong history & culture of prioritizing safety, with **hundreds of safety awards** annually from industry associations.

# STADIUM JOBSITE SOLUTIONS

Construction & Maintenance

## CASE STUDY

### AT&T Stadium, Arlington, TX

**Customer:** Manhattan Construction Company & TD Industries

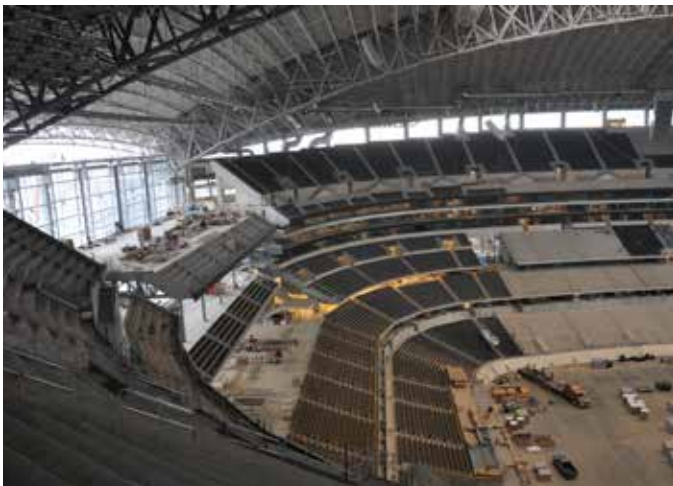

**Scope:** Provide safe, efficient **access solutions** for **HVAC and electrical installation** within the stadium's enclosed roof

**Solutions:**

- 24' x 40' **QuikDeck® Suspended Access System** floated around roof perimeter for HVAC duct and electrical installation
- 8' x 36' **stepped decks** from roof peak to walkway for electrical conduit and wiring
- Eliminated hanging scaffold, reducing cost and setup time

**Results:**

- **Cut install time by two-thirds** and **reduced cost by 50%** vs. supported scaffold
- Delivered a safe, efficient, and flexible access system for multiple trades
