TURBINE SERVICE LIFT

Get two technicians up-tower in half the time with turbine service lifts from **Power Climber Wind**.

- › Accommodates two technicians or up to 528 lb (240 kg) of material/equipment
- › Transport material/equipment remotely
- › 70 feet/min (18m/min) travel speed
- › Proprietary hoist and control technology with integrated safeties
- › Solid state electronics with active system status indication
- › Modular design is customizable to customer needs and fits almost any tower
- › Fully integrated design and ISO 9001: 2015 certified manufacturing
- › Lowest cost of ownership

Compliant with highest global standards:

- › Machinery Directive 2006/42/EC
- › EN81-44
- › ASME A17.8
- › CSA B44.7
- › AS1418.8
- › AS1735

TOWER AND BLADE ACCESS PLATFORMS

SIMPLE. STABLE. MODULAR.

Easy to transport, simple to install, and configurable for both blade and tower work, suspended access platforms from **Power Climber Wind** save time and money on inspection and repair operations.

2M Blade/Tower Access Platform

- › Access any part of a blade or tower, including the blade root
- › Integrated blade-capture lanyard system improves stability and allows quick position adjustments
- › Anti-sway design holds workers to blade surfaces to save time and effort
- › Heavy duty stirrup increases stability of platform
- › Engineered fall arrest anchorage point for safety lanyards and rescue devices simplifies safety planning

360° Blade Access Platform

- › Easily access all sides of a blade, or reconfigure for tower access
- › More confident technicians mean increased production
- › Simple design is lightweight, easy to transport and fast to set up
- › Proven components tested over time
- › No counterweights required
- › Low maintenance costs with use of standardized components

IBEX® INTELLIGENT CLIMB ASSIST®

THE MOST COMFORTABLE, RESPONSIVE CLIMB ON THE MARKET.

The patented IBEX® climb assist from Power Climber Wind puts complete control at the climber's fingertips, delivering personalized performance, increased safety, reduced fatigue and improved productivity.

- Reduced repetitive climbing stress and injuries
- User-selectable assistance from 50 to 125 lb (25 to 55 kg)
- Consistent load support moving up or down
- Durable polymer belt does not fray or damage ladder rungs
- Installs simply and retrofits in any wind tower
- UL, CSA, and CE compliant

IBEX Control Box
